Chetan Sawale

Web Developer — Full Stack Developer

9699486717 | sawalechetan102@gmail.com | LinkedIn | GitHub | Mumbai, Maharashtra, India

Professional Summary

Web Developer with hands-on experience building responsive websites and full-stack web applications using HTML, CSS, JavaScript, PHP, React.js, Node.js, Express.js, and MongoDB. Experienced in developing REST APIs, implementing JWT authentication, real-time communication using WebSockets, and integrating AI-powered features using RAG and vector databases. Strong foundation in frontend and backend development with practical experience building academic and personal web applications. Currently working as a Reports Executive with professional experience in data handling, reporting, accuracy, and client communication.

Technical Skills

Frontend: HTML5, CSS3, JavaScript, React.js, SCSS, Responsive Web Design, Figma
Backend: PHP, Node.js, Express.js, REST APIs, JWT Authentication, WebSockets
Databases: MongoDB, MySQL, Pinecone
Programming: JavaScript, PHP, Python
AI & NLP: RAG Architecture, LLMs, Embeddings, Transformer Models, Prompt Engineering
Tools: Git, GitHub, Postman, VS Code, Render, Microsoft Excel

Work Experience

Hitachi Cash Management Services *Reports Executive — Present*

- Prepare and manage daily transaction reports for banking clients, ensuring accuracy and timely delivery.
- Process, organize, and analyze operational data using Microsoft Excel for daily reporting requirements.
- Coordinate with multiple locations to collect, verify, and follow up on data required for reporting.
- Communicate with banking clients and internal teams to resolve reporting-related requirements and discrepancies.
- Maintain accuracy and consistency while handling daily reporting activities under strict deadlines.

Projects

Conversational AI Assistant with Long-Term Memory *Node.js, Express.js, Pinecone, MongoDB, WebSockets*

- Built a ChatGPT-style conversational AI assistant with short-term and long-term memory for context-aware responses across sessions.
- Implemented Retrieval-Augmented Generation (RAG) using Pinecone vector database and embeddings for retrieving relevant long-term conversation context.
- Developed backend services using Node.js and Express.js with MongoDB for storing user and conversation data.
- Implemented real-time communication using WebSockets to support interactive chat functionality.
- Integrated transformer-based models to generate context-aware conversational responses.

Hotel Booking Web Application *React.js, Node.js, Express.js, MongoDB, JWT*

- Developed a full-stack hotel booking web application with separate frontend and backend architecture.
- Implemented user authentication and authorization using JWT.
- Built REST APIs using Node.js and Express.js for users, hotels, rooms, and booking-related operations.
- Integrated MongoDB for storing user, hotel, room, and booking data.
- Designed responsive user interfaces using React.js for browsing hotels and managing bookings.

Carpooling Website *HTML, CSS, JavaScript, Express.js, MongoDB*

- Developed a web-based ride-sharing platform using HTML, CSS, and JavaScript for the frontend.
- Implemented backend functionality using Express.js and MongoDB for application data management.

PromptVault *AI-Powered Web Application*

- Developed an AI-powered prompt management application for storing, organizing, and reusing prompts efficiently.

Education

St John College of Engineering and Management, Mumbai University *May 2022 – May 2026*
Bachelor of Engineering in Computer Engineering **CGPA: 7.6**

Government Polytechnic Awasari, MSBTE *Jun 2019 – May 2022*
Diploma in Mechanical Engineering **Percentage: 80%**

Certifications

AI-Powered Cohort – Web Development
Python Programming – Udemy
Blockchain Bootcamp – Block Intelligence

Additional Information

Languages: English – Advanced, Hindi – Advanced, Marathi – Native
Interests: Web Development, UI/UX Design, AI Applications
